EDUCATION

New Jersey Institute of Technology, Newark, NJ

September 2021 - December 2025

Ying Wu College of Computing

Bachelor of Science | Field of Study: Computer Science

WORK EXPERIENCE

Software Engineer | rancscapital.com

September 2025 - Present

- Led engineering for a revenue-generating real estate investment platform that enabled investors, builders, and sellers to discover, list, and sell properties through a streamlined web experience.
 - Built CRM systems and outreach automation bots that improved lead generation, follow-up consistency, and pipeline management for property acquisition and sales workflows.
 - Shipped website and platform improvements that helped convert inbound traffic into qualified leads and supported day-to-day business operations.
-

Coding Projects

FitTrack+ — Full-Stack Fitness Platform (Web + Mobile)

www.FitsTrack.com

- FitTrack+: Grew FitTrack+ to 2,000+ downloads and 200+ active users by building and launching a cross-platform fitness app across web and mobile.
- React, Next.js, React Native, Spring Boot, Java, REST APIs, OAuth, SQL, Docker, Vercel
- C fDesigned and developed a cross-platform mobile application for FitTrack using React Native, extending core website functionality to iOS and Android.
- Built RESTful APIs in Java Spring Boot to support mobile and web clients, handling authentication, workouts, nutrition logs, and user profiles..
- Implemented secure authentication flows (JWT + Google OAuth), ensuring seamless login across web and mobile platforms.
- Architected a shared backend serving both the web app (Next.js) and mobile app, improving code reuse and system scalability.

Security Consulting Firm Website

- Created a professional website for a security consulting firm, focusing on intuitive navigation and information clarity
 - Collaborated with the client to meet specific business requirements.
-

TECHNICAL SKILLS
